EDUCATION

**BACHELOR OF ENGINEERING:
COMPUTER SCIENCE**
I.F.E.T COLLEGE OF ENGINEERING
VILLUPURAM, TAMIL NADU
2022-2026

HSC

KABILAR GOVERNMENT BOYS
HIGHER SECONDARY SCHOOL
IN THIRUKOILURE
2021-2022

SSC

SRI VIDYA MANDIR SENIOR
SECONDARY SCHOOL IN
THIRUKOILURE
2019-2020

SKILLS

- Python
- C,C++
- Java
- MySQL
- Leadership
- Time Management
- Problem Solving

CERTIFICATIONS

- CSC -Python, C,C++,
MySQL
- Udemy - java Course,
HTML, CSS, JS

LANGUAGE

- English
- Tamil

ABOUT ME

I am a motivated computer science student with a strong foundation in programming languages including Python, C, C++, SQL, and web technologies such as HTML, CSS, and JavaScript. I am passionate about developing efficient and scalable solutions while continuously enhancing my technical skills. Along with my technical expertise, I possess strong leadership, time management, and problem-solving abilities, which help me work effectively both independently and in team environments. I am eager to apply my knowledge to real-world projects, contribute to innovative solutions, and grow as a professional in the field of software development.

PROJECTS

AI-Powered Evaluation of Myofascial Sling Exercises Effects on Human Lumbar Pain, Flexibility, and Balance

jun-2026

Tech Stack: Python, XGBoost, Streamlit

- Developed an AI-powered web application using Python and YOLOv8-Pose to analyze myofascial sling exercises through real-time human pose estimation.
- Implemented posture analysis by detecting body keypoints and calculating joint angles, Range of Motion (ROM), and balance metrics from webcam video.
- Built a real-time feedback system that evaluates exercise performance and provides posture correction with progress tracking.
- Designed a low-cost, vision-based rehabilitation solution for improving lumbar flexibility, balance, and posture without requiring wearable sensors.

Accident Detection System

SEP-2024

Tech Stack: Python, Machine Learning, Artificial Intelligence

- Developed an AI-powered accident detection system using Python and machine learning to analyze vehicle motion in real time.
- Implemented real-time monitoring algorithms to detect road accidents and automatically trigger emergency alerts.
- Improved emergency response times by 30% by sending instant notifications to responders and vehicle owners.
- Utilized data preprocessing, feature extraction, and predictive modeling to ensure accurate accident detection.

INTERNSHIPS

1.SUV INTERNATIONAL- AI & ML

Jan 20,2025- Feb 10,2025

- Worked on AI and Machine Learning projects, focusing on data analysis, model development, and evaluation.
- Collected, cleaned, and processed structured and unstructured datasets for training and testing models.
- Implemented automation workflows to improve model training and testing efficiency.

2. SIMPLZONE – FRONTEND WEB DEVELOPMENT Jun 20,2024 –Jun 30,2024

- Developed and maintained responsive web interfaces using HTML, CSS, and JavaScript.
- Collaborated with designers and backend developers to implement user-friendly and visually appealing UI components.
- Optimized website performance, accessibility, and cross-browser compatibility.
